

# Take Control of Your Music

## Genos

Welcome to a new era of  
Digital Workstation.

Genos redefines workstation sound, design and user experience. Whether in a recording studio, on stage or at home, Genos will inspire and enhance music performance for a new generation of musicians.

# Genos

## Professional made easy

Genos is the professional but easy way to create and produce music. Due to its fast access to a creative sound pallet, you stay in the creative flow and enjoy true inspiration. Genos is not just the perfect instrument to play and enjoy your favourite music; use it to write and build your song – either at home, on stage or in the studio.

Enjoy GENOS with the new optional GNS-01 speaker system and optional L7B stand.

### Easy navigation and intuitive touch screen control

Designed for the player, Genos features a large colour touch screen and intuitive button layout for quick and easy access. Craft your sound like never before with Live Controls: Genos has 9 sliders, 6 knobs and 7 assignable buttons!

### Easy access to keep the creative flow

Genos is designed to keep you in the creative flow. Access the sounds and functions you need quickly and without distraction. Important information is shown in the screen and a secondary display is dedicated to Live Control functionality

### Easy storage with unlimited space for your creativity

With almost 60GB of solid state memory, Genos is the perfect home for your creative ideas. 2GB of built-in expansion memory allows the Genos to grow with you, while 3 x USB-to-device sockets ensure you can take your data with you, wherever you go.

### Professional, breathtaking sound with unparalleled realism

1700 exclusive Yamaha Voices, new Revo! Drum technology and 550 Styles are supported by a huge library of arpeggio types, expanded Multi Pads and extreme DSP power for a playing experience like never before.

### Enhanced features for enhanced experience

Genos is home to many exciting new features. Live Control gives real-time access to your sound alongside a joystick for both pitch and modulation adjustments. The new Playlist function keeps your data organised and accessible, especially for live performance while two song players, supporting both MIDI and Audio playback, are enhanced with a crossfader and even MP3 lyrics.

### Professional Output

High quality outputs are an important factor in how an instrument sounds through speakers. Upgraded D/A converters are joined with a new digital output for studio usage, alongside new support for condenser microphones with phantom power.

### Compatibility & Expandability

Genos makes it easy to upgrade from previous Yamaha instruments with impressive compatibility support. WIFI is built in and the Songbook+ app offers a unique two-way communication for live performance and music data organisation. Furthermore, a new version of YEM will be released supporting advanced WAV editing.
